

# Have you already made an appointment for a dental examination for your child?

Oral health plays an important role in health and well-being of all of us. We need our teeth every day to speak, eat and smile. Milk teeth are just as important as permanent teeth, and it is essential to keep them healthy.

Take good care of your child's teeth from the early age on. Help them to adopt the right preventive measures and a good oral hygiene to keep their teeth healthy. Make an appointment with your dentist right now and ask for advice. Specific annual check-ups for children aged 2,5 and 3,5 are intended by the law. **These consultations are refunded at 100%.**

- > **Dental examination of children aged between 30 and 36 months (Code DE 2)**
- > **Dental examination of children aged between 42 and 48 months (Code DE 3)**

**Keep taking your child to the dentist at least once a year.**

Loi du 15 mai 1984 introduisant des examens médicaux systématiques pour les enfants âgés de deux à quatre ans et règlement grand-ducal du 12 décembre 1984 déterminant les modalités des examens médicaux et dentaires des enfants âgés de deux à quatre ans.
